

ELECTRIC AUTOMATIC ROLLER IRONER Ø 180 MM, TABLE TOP S-80/18 B

Ref: 0912.12.020A
Magnus

Table top version.

Aluminum press especially coated to ensure durability and energy savings.

Optimized input profile that speeds up and eases the introduction of the items to be ironed.

Roller supported by bearings.

Front use: the appliance can be installed against a wall.

Wood input board that can be oriented to ease laundry introduction and suit the position of the user, be he or she standing or sitting.

Electronic and electromechanical safety thermostat that prevents abnormal overheating.

Electronic control board, affords excellent temperature stability.

Powerful-thickness thermal insulation, prevents heat loss and energy waste.

Finger-safety rod that, when activated owing to misuse, protects the user by inverting roller rotation and lifting the heating basin.

Emergency push-button.

Selection of ironing temperature by a push-button.

Painted steel-sheet structure and 4 Adjustable legs.

Safety device that prevents machine switch-off when the pressure basin is hot and down against the roller.

Automatic basin moving. Electrical board is easily accessed in case of maintenance.
