

MANUAL ROLLER IRONER Ø 180X1200 MM S-120/18EM

Ref: 0912.12.005
 Magnus

Specially-processed aluminum basin that ensures long life and energy conservation.

Optimized introduction profile, for faster and easier laundry introduction.

Roller supported by bearings.

Front loader use: The ironer can be installed against a wall.

Safety rod for finger safety that protects the user against mismanouver by inverting roller rotating direction.

Electronic thermostat and electromechanical safety thermostat.

Electronic control panel that affords excellent temperature stability.

Thick thermal insulation that prevents heat loss and energy waste.

Selection of ironing temperature by a push button.

Plastic-coated sheet-metal structure. 4 Adjustable legs.

Safety device that prevents machine switch-off when the press basin is hot and down against the roller.

Wide pedal for manual basin operation.
