Zumex's flagship is the best choice for supermarkets, hotels, restaurants and businesses with high demand for freshly-squeezed juice. The undisputed leader in performance.

Featuring the new NSF-certified 1Step Kit to make cleaning the machine almost as easy as pouring juice. A more ergonomic one-piece design for extracting the unit. It has the best self-service tap on the market, sturdier, with fewer parts and easier to disassemble and clean. With locking function for continuous operation and an improved anti-drip system.

Automatic PulpOut system, with triple filtration and conveyor belt that transports the soluble fibre and eliminates unpleasantly long fibres. It is also much lighter and easier to handle during removal for cleaning.

New cleaner and more protected look thanks to the Dark cover, the new Inox peel outlets and the digital display cover.

If you are sure about this option, all you have to do is choose between the Countertop, All-in-One and Tank versions, with a storage tank for juice. Don't look for something better, because it doesn't exist.
